#### HOW TO: Install Primavera P6 Professional on your Windows 7 Computer

- 1. Using your Windows file explorer, locate the **Setup.exe** file in the **P6\_R83\_Client\_Applications** folder and right-click on it.
- 2. Select the **Open** option from the menu. You can also double-click to start the installer.

The installer may prompt you to install certain prerequisite programs on your machine. These include the **DHTML Editing Component** and **Microsoft .NET Framework 4 (x86 and x64)**. If prompted, allow the installer to proceed with these installations.
